

# The Note

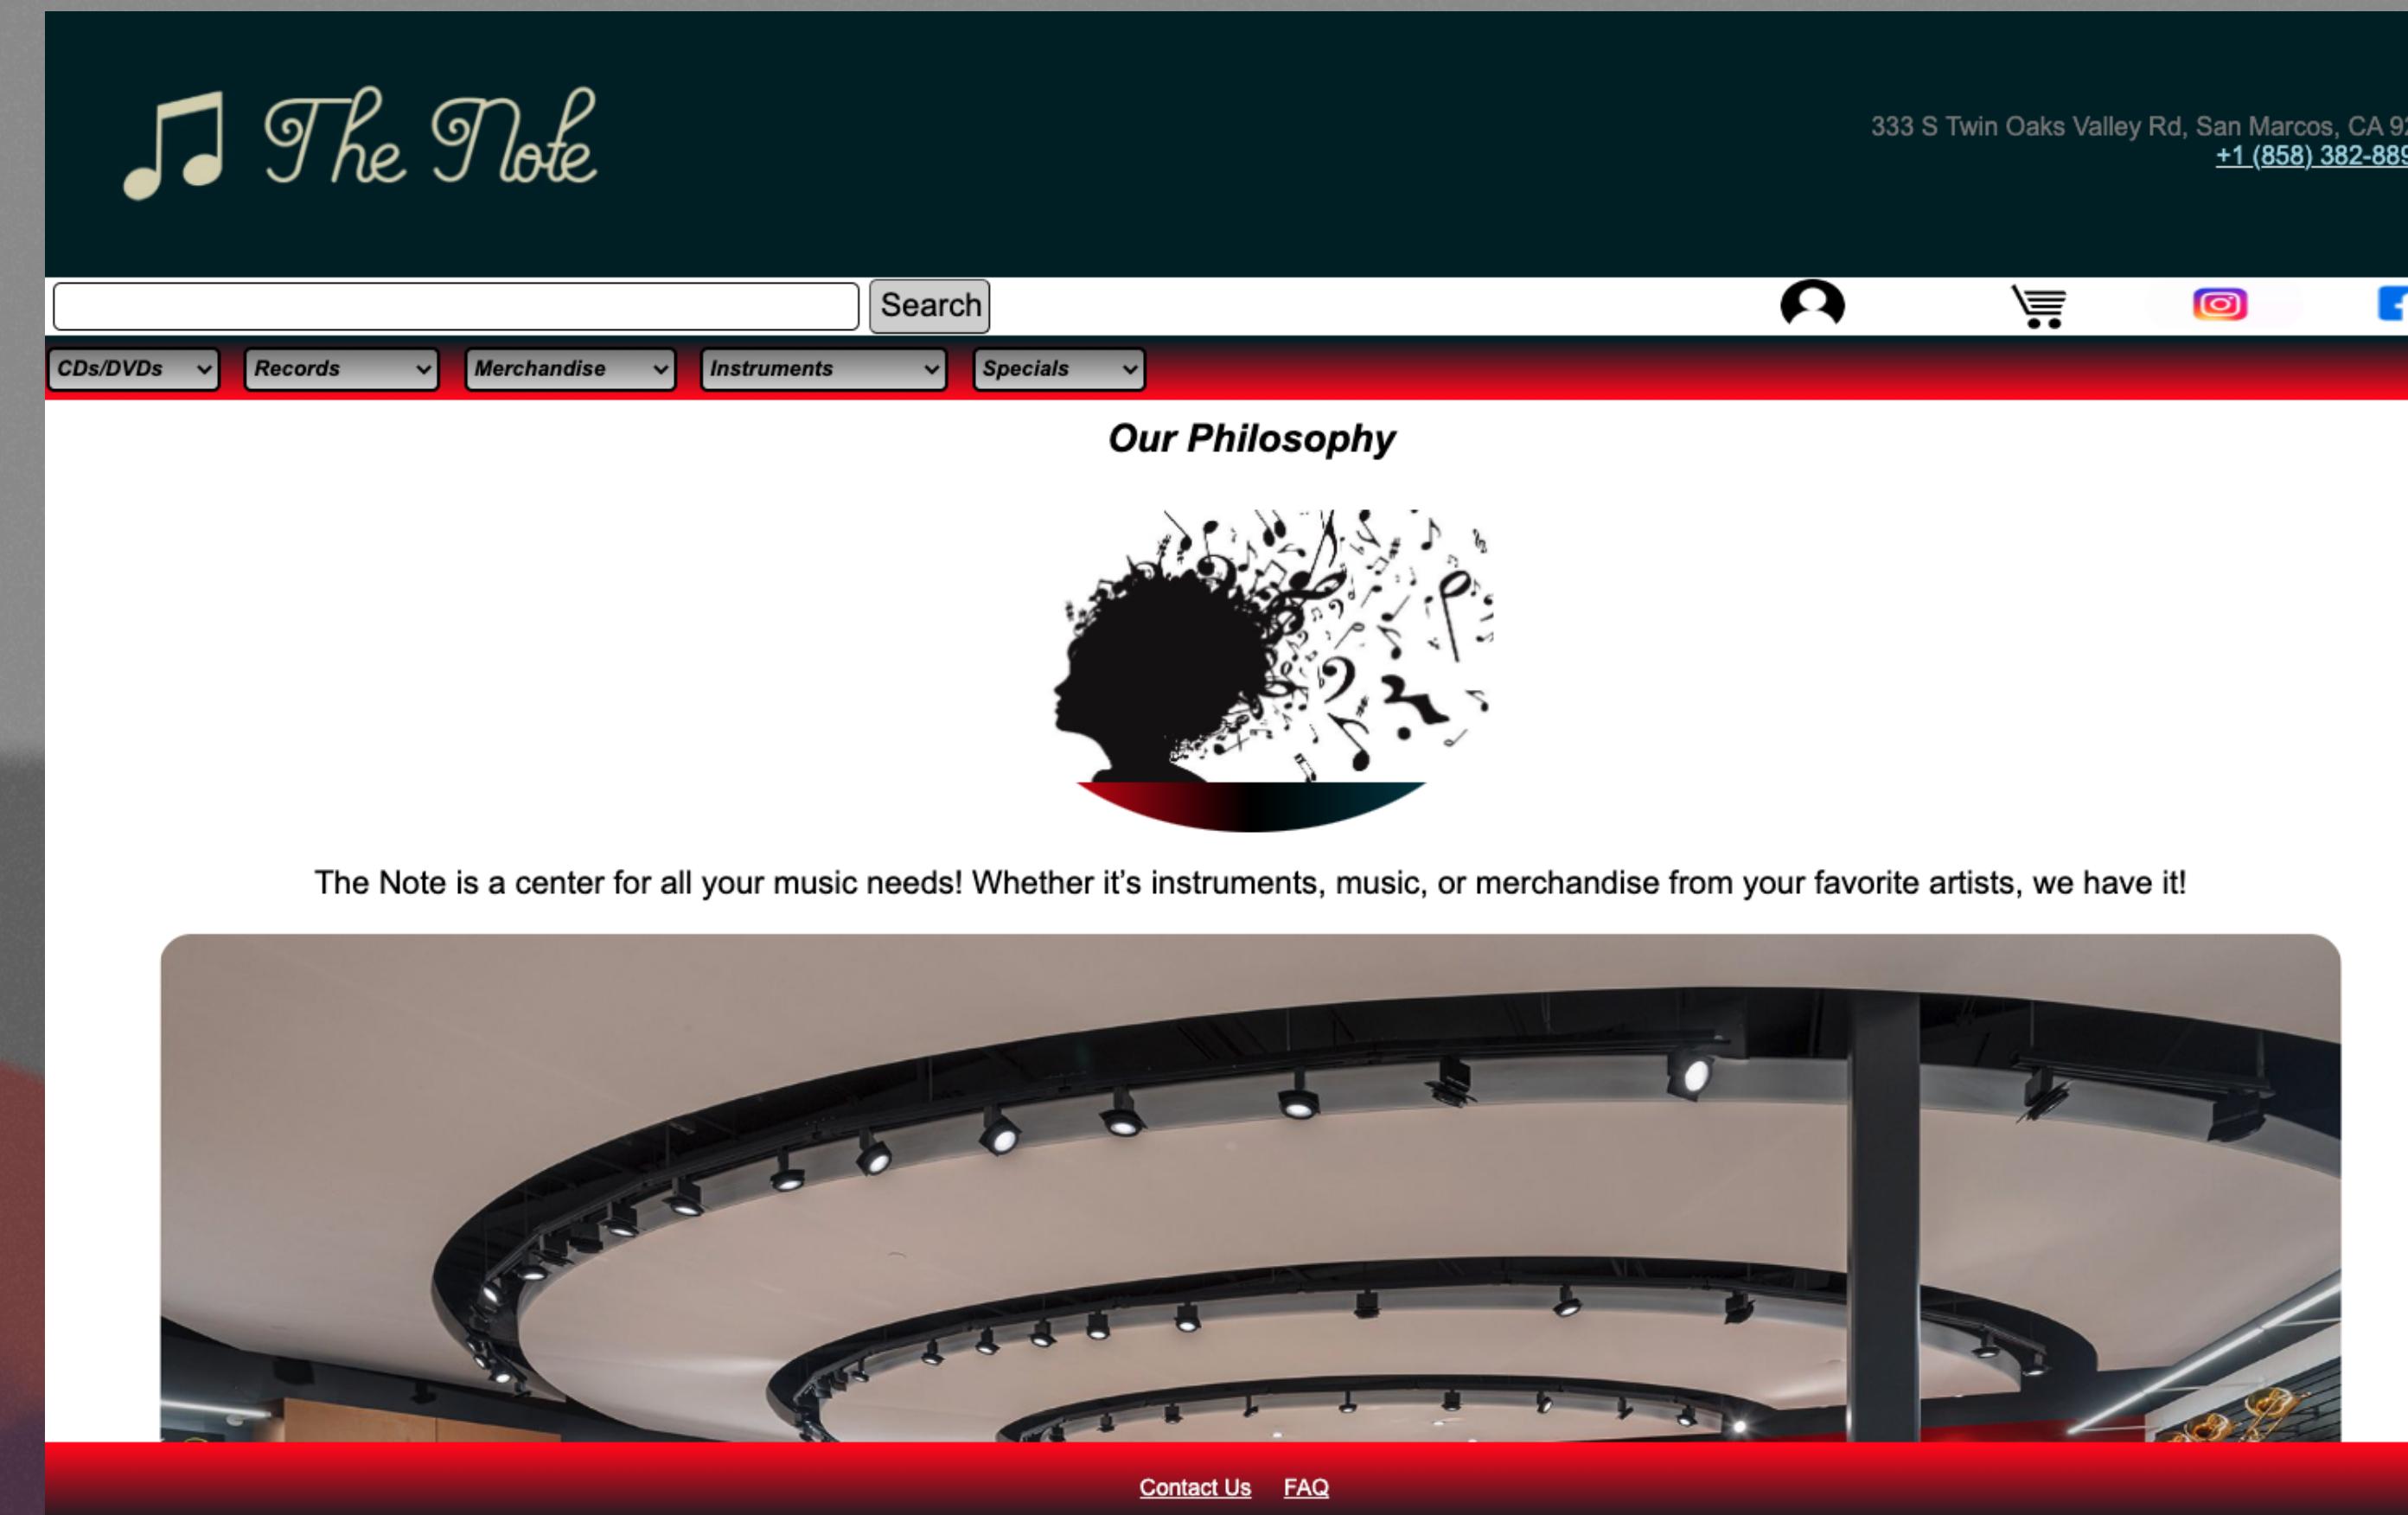

## Final Presentation

Team 3 - Adrian Bernardino, Mark Laow, Stephania Rey, Matthew Roman

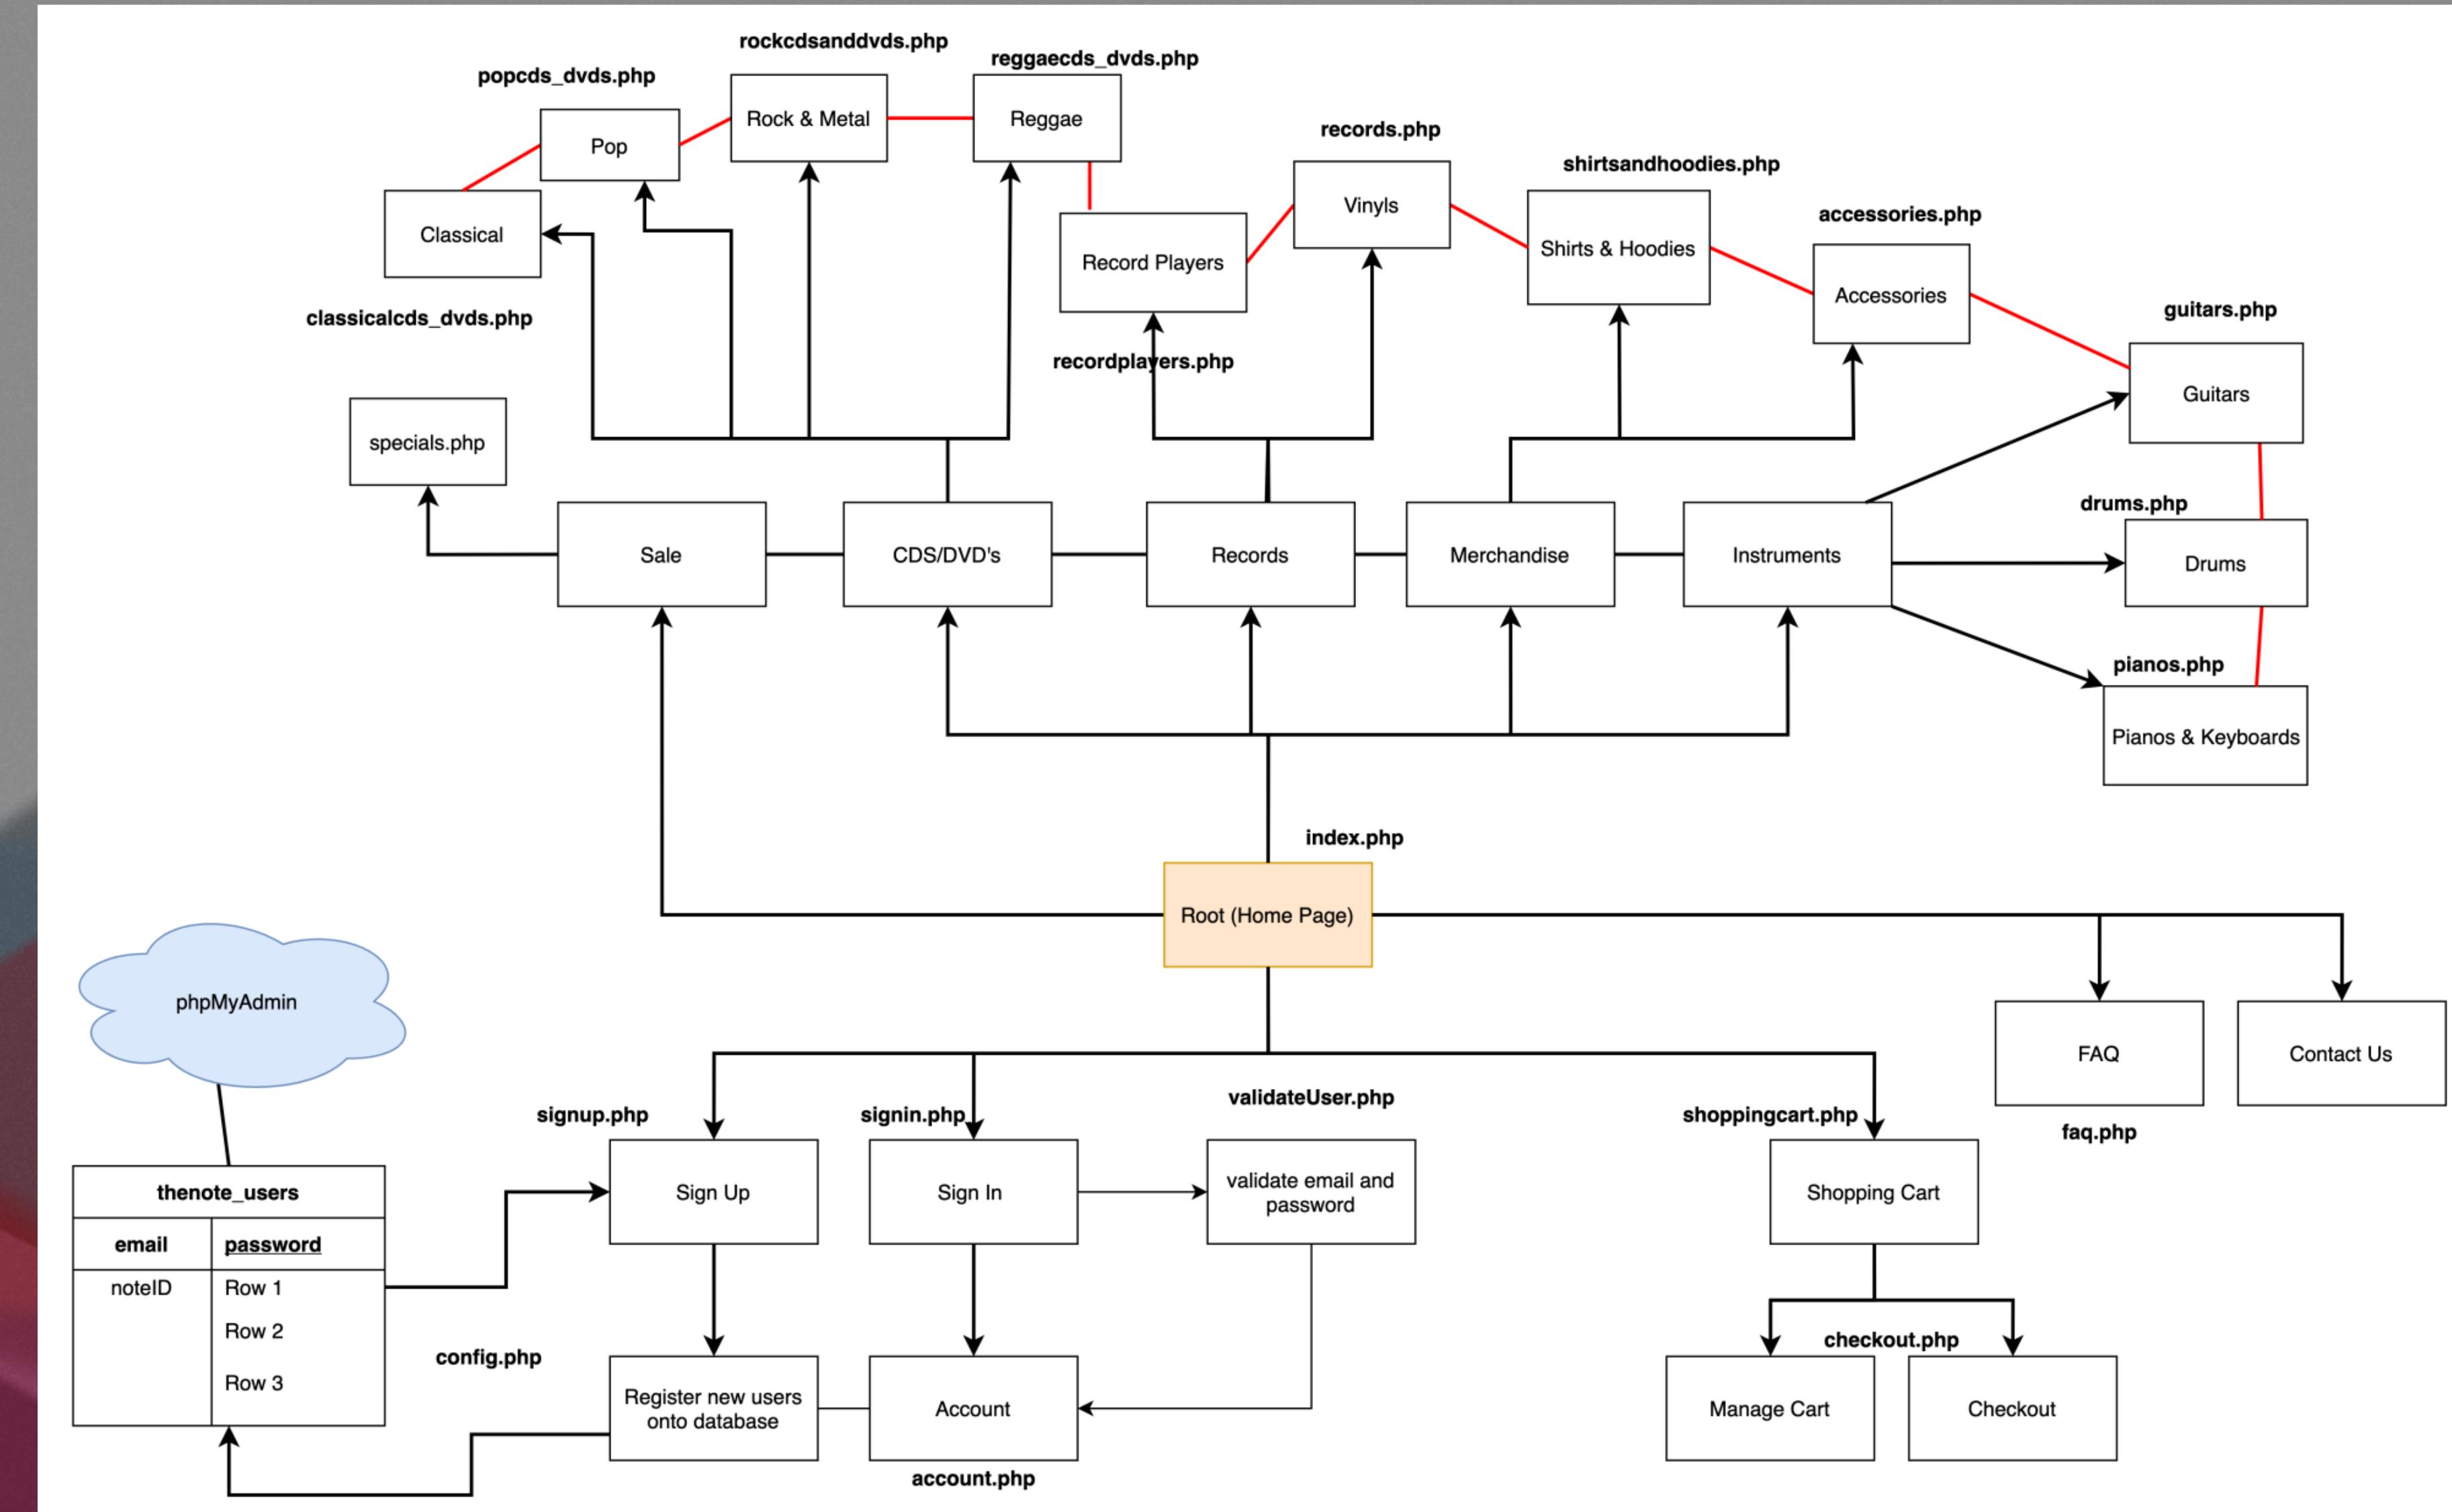

# Webpage User Interaction Goals

- Easy to use and intuitive
- Appealing to look at
- Utilizes php, css, and js
- User is able to easily understand the website

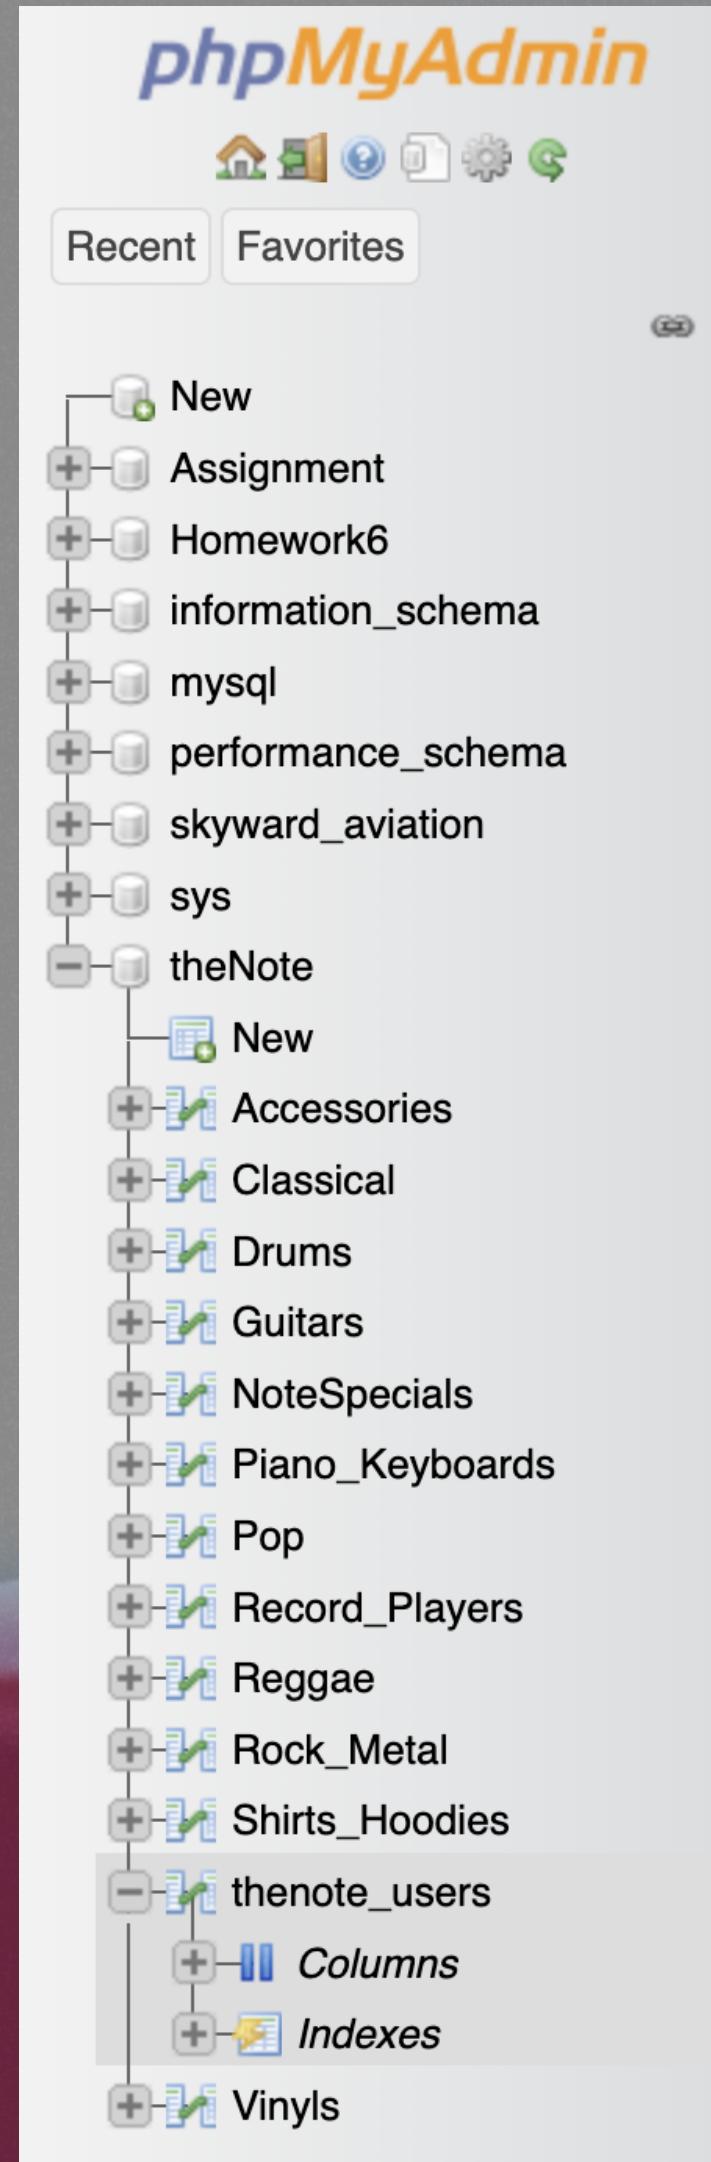

# Webpage Interactions

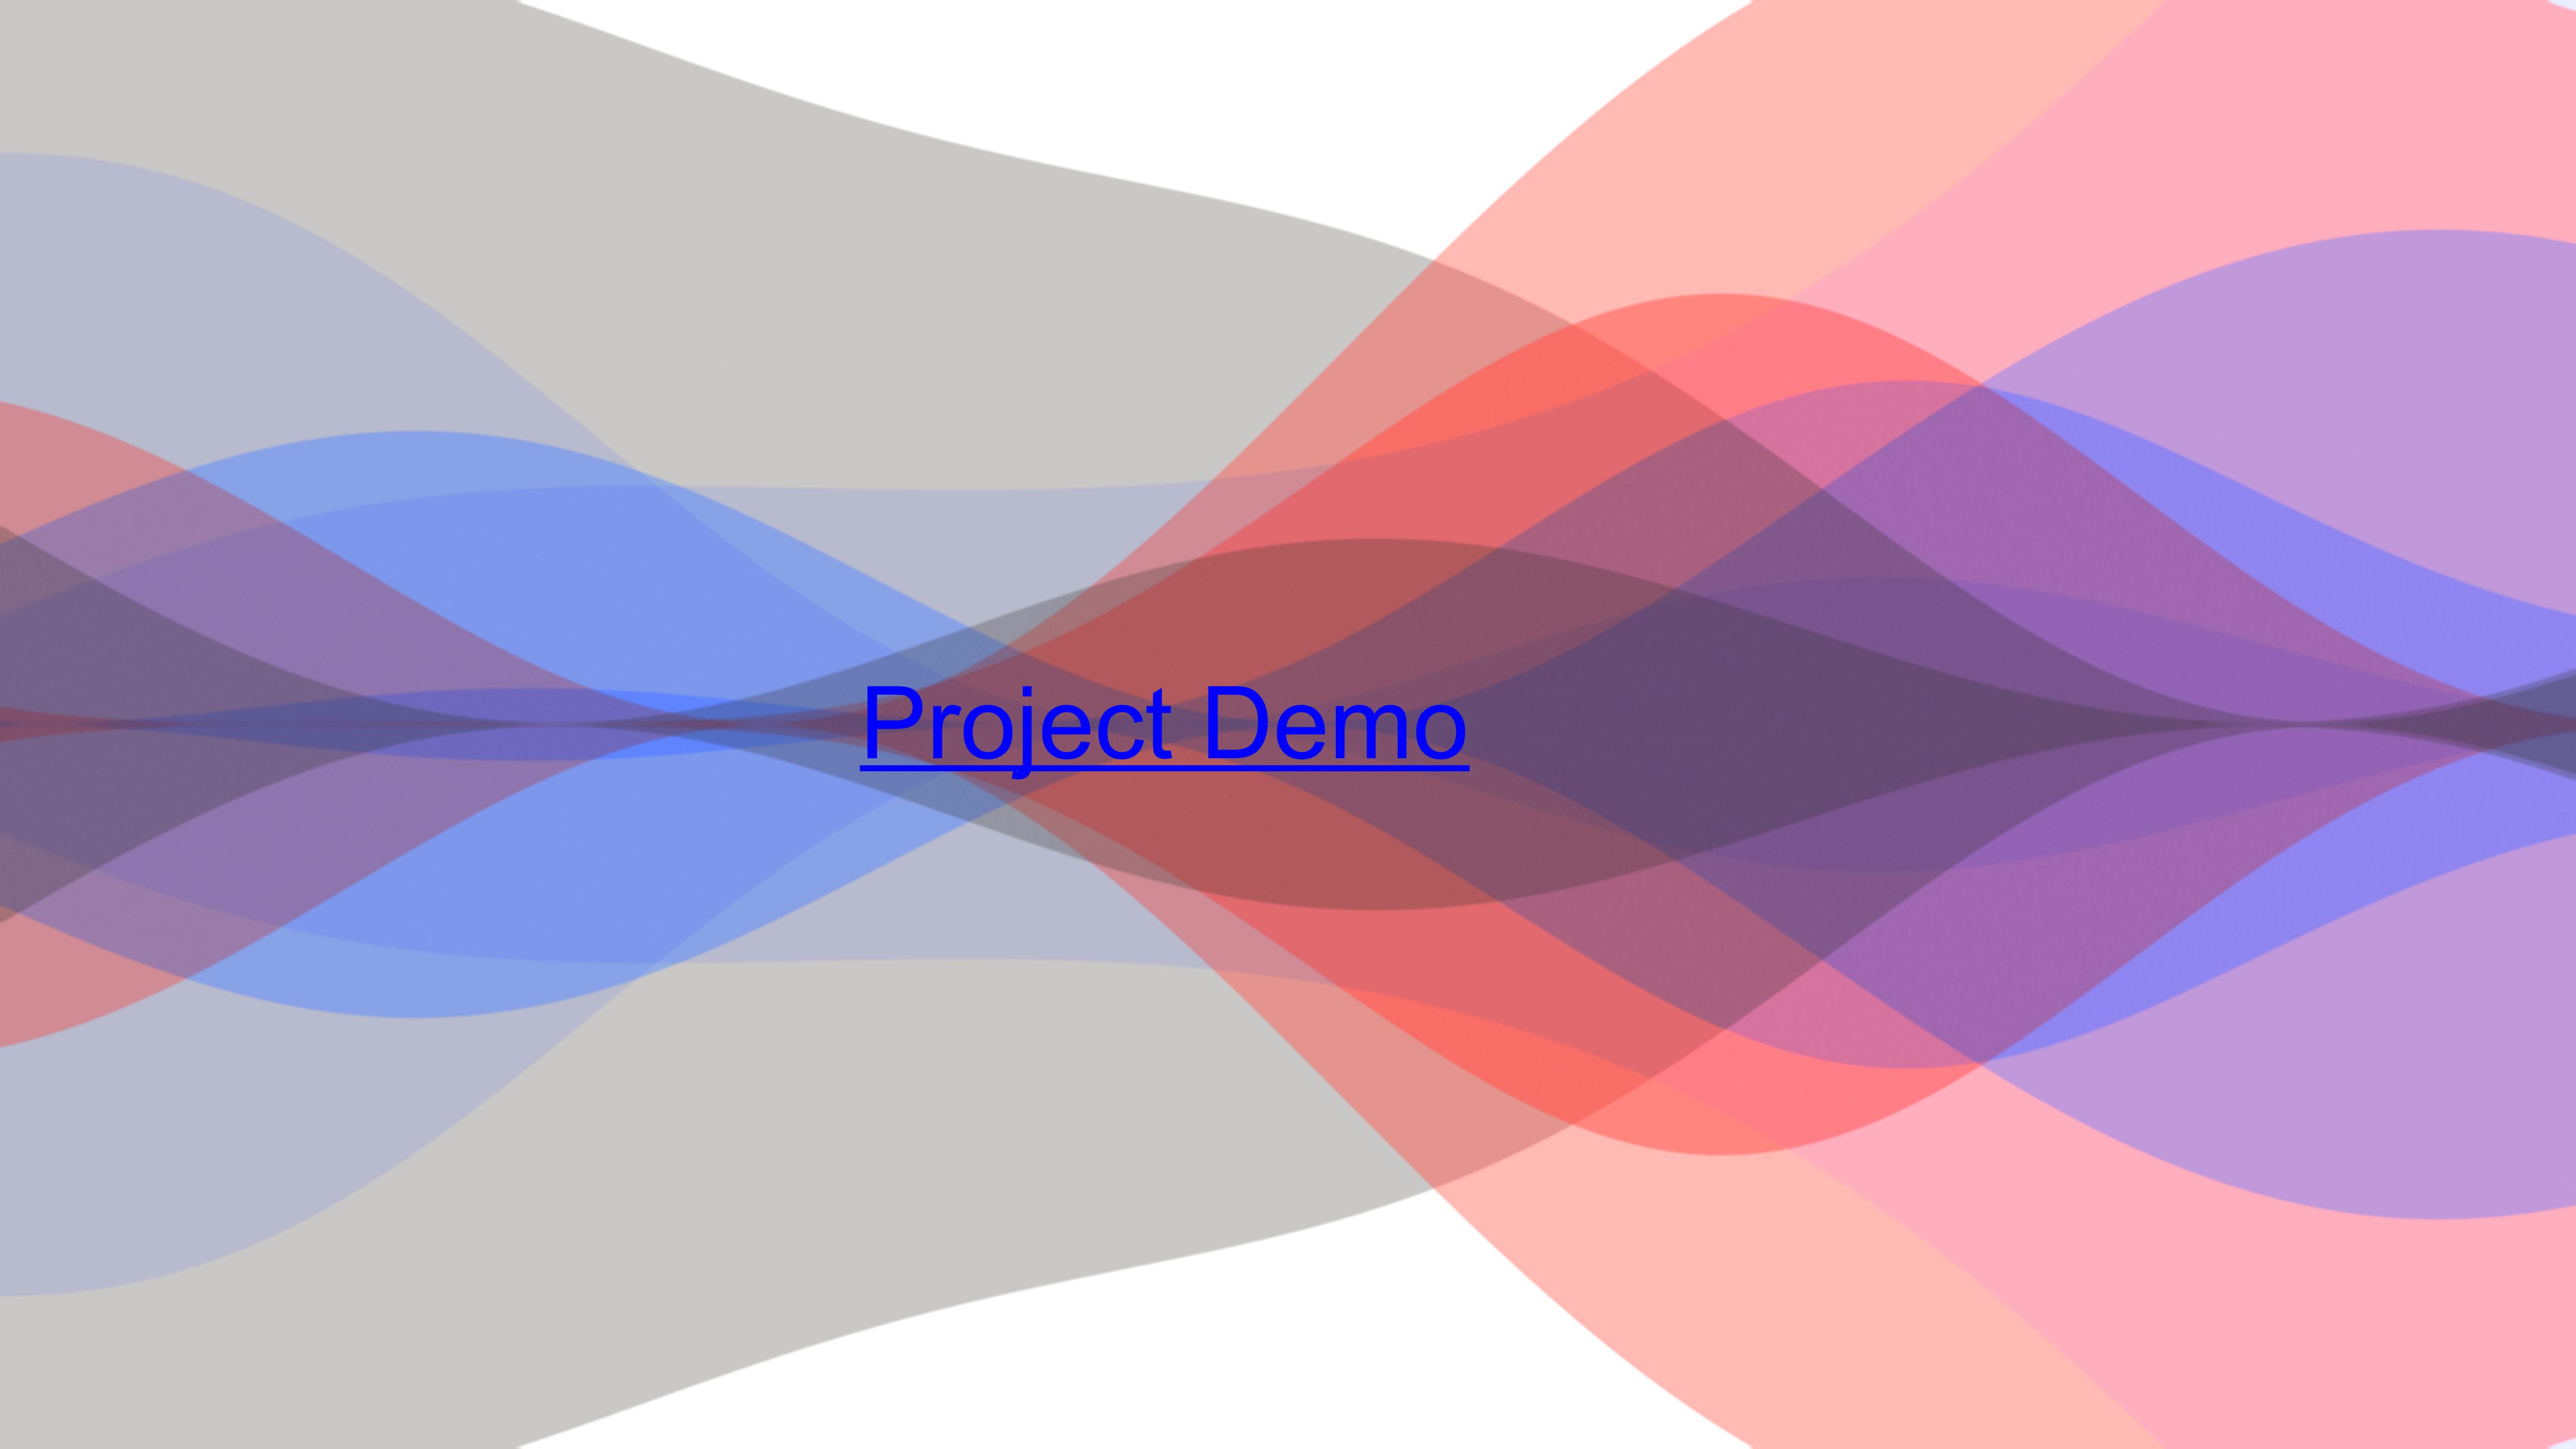

- All pages link together through the navigation bar
- Sign Up and Account pages link through PHP
- Use scripts for functions such as password hiding and modifying values

# Database design - phpMyAdmin

Classical	
PK	<u>product_id</u> INT
	product_name VARCHAR(100)
	price DECIMAL(10, 2)
Pop

NoteSpecials	
PK	<u>product_id</u> INT
	product_name VARCHAR(100)
	price DECIMAL(10, 2)
	description TEXT
	image VARCHAR(100)

The background of the image features a complex, abstract design composed of numerous overlapping, semi-transparent colored bands. These bands are arranged in a radial pattern, creating a sense of depth and motion. The colors used include various shades of blue, purple, red, orange, yellow, and green, which blend together at their intersections. The overall effect is reminiscent of a Rorschach inkblot or a stylized sunburst.

Project Demo

## Possible future enhancements

- Backend using PHP for payment method
- Implement PHP across all webpages to store and modify user information
- Alternative cloud services

# Teams Contributions

- ADRIAN- color-way changes, phpMyAdmin database implementation, fixed nav bar in homepage, shopping cart enhancements, sign in and sign up page & configured each page.
- MARK- link category buttons to other pages work on adding sale items to the current navigation bar drop down menus and link them to their corresponding parts, Added Matt's options into the drop down lists. Added in contents for About Us and FAQs. Added padding so that it is nicely fitted into the grey contents areas. added stuff to right hand corner(social media, contact info)
- MATTHEW- make CSS/Javascript is consistent throughout all web pages, Clean up account page Need ability for user to change their personal information --> JavaScript , For Account Page: Added profile picture, and basic user information. Kept the exact same format for the website to retain a consistent look , added stuff to right hand corner(social media, contact info) ,- new navigation bar, implemented the new photos & repositioned them to line up better with the selections.
- STEPH-linking the sale items on homepage to the inventory items, created pages (CDs/DVDs.Records, Merchandise, Instruments, Specials), home page: change the beige to white. Cut down the about us. Make it so the black borders around those category images appear on hover. Also make the changing image smaller

# Thank you!
